

Sphere with 18 holes: 1 on the upside (on the middle axis), 1 on the downside (on the middle axis), 8 on the equator (90° to middle axis) with equal distances, 4 on the upper side (45° to middle axis) with equal distance, 4 on the underside (45° to middle axis) with equal distance from each other. The diameter of the sphere is 55 mm.

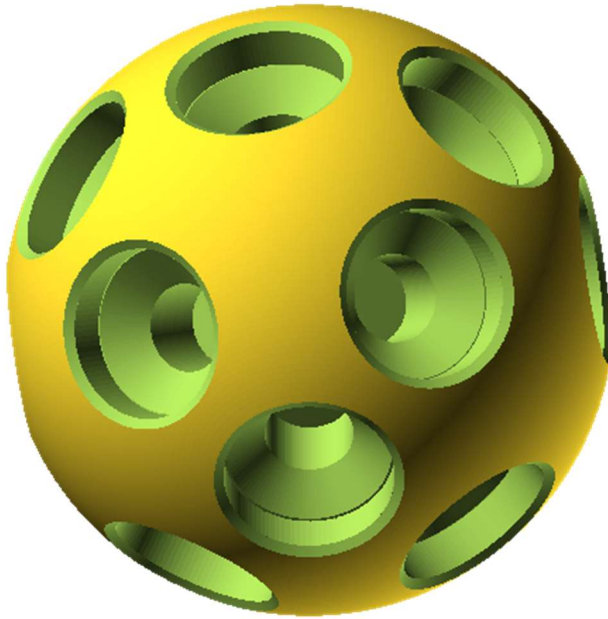

Material is beech wood, no surface treatments

No toxic ingredients, no composite wood, FSC labelled

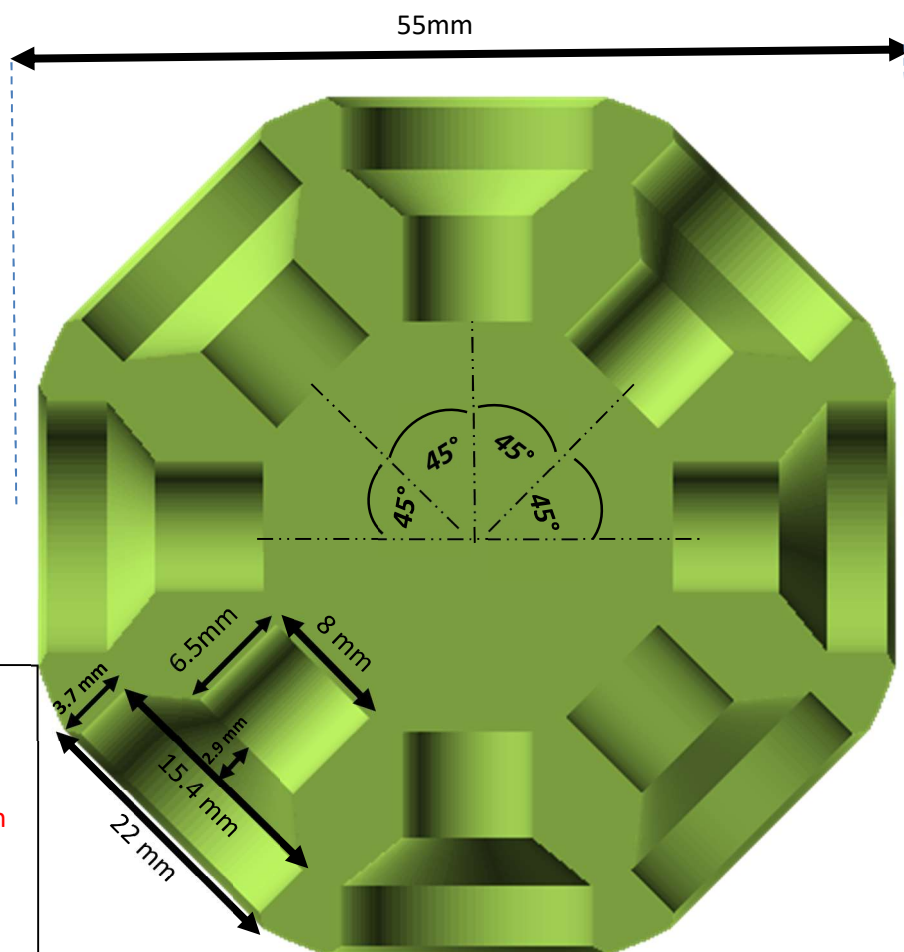

This is for a children's toy, so we have to respect the European EN 71 standard norms
